

## **Production Process**

Selection and storage of raw material.

The company selects quality raw material.

Every step in the process is verified from percentage of rice, to cooking to view physical characteristics.

## **Milling**

The company has longstanding experience in the milling of rice, milling rice to meet customer's needs.

The company has extensive warehousing designed for the storage of quality rice.

## Quality Control

Milled rice is separated removing any stones and impurities.  
The rice is then passed through machines for color and size separation providing one hundred percent quality rice for our customers!
